

Project Demo Planning

Date	04 July 2026
Team ID	XXXXXX
Project Name	Credit Card Approval Prediction
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the Credit Card Approval Prediction project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S. No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Explain the challenge of manually reviewing thousands of credit card applications and how it leads to delays and human error.	3	Alia Suhana (Team Lead)
2	Solution Overview & Architecture	Walk through the technical architecture — Flask backend, joblib-loaded ML model, and the three-tier request flow.	3	Kamakshi Karri
3	Model Training & Feature Engineering	Show the CreditCard.ipynb notebook: dataset, feature preparation, and how the best-performing model was selected and saved.	4	Karri Pujitha
4	Live Application Walkthrough	Demonstrate the web form (predict.html), submit sample applicant profiles, and show both Approved and Rejected outcomes in real time.	5	Mallampati Bhanu Keerthi
5	Error Handling & Edge Cases	Show how invalid or missing form inputs are gracefully handled via the try/except logic in app.py.	2	Bellamkonda Venkatesh
6	Q&A and Closing Remarks	Answer questions from mentors/evaluators and summarize the project's future scope (explainability, deployment, authentication).	3	Alia Suhana (Team Lead)

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Briefly explain the problem of manual credit card application screening and how machine learning solves it.
2	Solution Overview	Present the technical architecture (Flask backend + ML model) and the tech stack used (scikit-learn, joblib, pandas, numpy).
3	Live Feature Demonstration	Submit sample applicant data through the web form and show both Approved and Rejected outcomes in real time.

4	Q&A Session	Address questions from mentors/evaluators and discuss future enhancements such as explainability and production deployment.
