

Problem-Solution Fit

Date	3 July 2026
Team ID	XXXXXX
Project Name	Credit Card Approval Prediction System
Maximum Marks	5 Marks

Problem-Solution Fit Canvas:

Use the framework below to ensure your proposed solution accurately addresses the root causes, behaviors, and limitations of your target audience. Fill out the canvas in the respective boxes just like the original visual template.

1. CUSTOMER SEGMENT(S) [CS] Bank credit analysts, financial compliance officers, and prospective credit card applicants at retail and commercial banks.	6. CUSTOMER LIMITATIONS EG. BUDGET, DEVICES [CL] Limited IT budget for new infrastructure; analysts have limited ML expertise; branches may have low-bandwidth internet; customers use basic smartphones/browsers.	5. AVAILABLE SOLUTIONS PROS & CONS [AS] Manual review: accurate but slow. Rule-based scorecards: simple but rigid. Credit bureau outsourcing: reliable but costly and slow to integrate.
2. PROBLEMS / PAINS + ITS FREQUENCY [PR] Manual review of applications is slow and error-prone; occurs for every one of the thousands of applications received daily.	9. PROBLEM ROOT / CAUSE [RC] No automated, data-driven decision system exists, so every application relies on manual cross-referencing and subjective judgment that cannot scale with volume.	7. BEHAVIOR + ITS INTENSITY [BE] Analysts manually cross-check financial documents and credit reports daily (high intensity); customers frequently call or visit branches to check status (moderate-high).
3. TRIGGERS TO ACT [TR] Application backlogs pile up; compliance audits flag inconsistent decisions; customers complain about long wait times.	10. YOUR SOLUTION [SL] An ML-based Credit Card Approval Prediction System (Flask + IBM Watson ML) that scores applicant data instantly, giving analysts and customers consistent, real-time approval/rejection predictions.	8. CHANNELS OF BEHAVIOR [CH] ONLINE: Bank web portal, customer self-service eligibility site.
4. EMOTIONS BEFORE / AFTER [EM] Stress and anxiety before; confidence and relief after.		OFFLINE In-branch application desks, phone and call-center follow-ups.
