Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • I just want a quick answer on whether I qualify. • Why do I need to fill in so many fields just to check eligibility? • I don't understand why my application was rejected.	THINKS • Will my income and credit history be enough to get approved? • I hope checking this doesn't affect my credit score. • There must be a faster way to know if I qualify.
CREDIT CARD APPLICANT <i>(Prospective Customer)</i>	
DOES • Fills out online forms with income, employment, and credit details. • Compares credit card offers from multiple banks. • Checks credit score reports before applying.	FEELS • Anxious about being rejected. • Frustrated by the lack of transparency in the approval process. • Relieved and confident when given an instant, clear answer.
