Project Name	Credit Card Approval Prediction System
Maximum Marks	2 Marks

Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	A person, organization, or system outside the project that sends or receives data (e.g., Applicant, Bank Analyst, IBM Watson ML).
Rectangle with numbered header	Process	An activity that transforms incoming data into outgoing data (e.g., Validate Application, Run Prediction Model).
Rectangle (solid fill, no number)	Data Store	A place where data is held for later use (e.g., Applicant Database, Prediction Records).
Labeled arrow	Data Flow	The movement of data between entities, processes, and data stores, labeled with what data is being passed.

Example

The diagram below illustrates how the symbols above come together to form the complete data flow diagram for the Credit Card Approval Prediction System.
